Work with us

As we build Qatar Biomedical Research Institute (QBRI) infrastructure, we demand excellence at all levels - in the people we employ, the facilities we use and in partnership with the best biomedical research institutions. We invite outstanding candidates to join our team of world-class research colleagues and develop personalized solutions for chronic and severe diseases. We are currently looking to hire researchers.

Intern with Us

QBRI is committed to the training and development of the next generation scientists and highly skilled workforce by providing mentoring, advanced scientific and research training opportunities and career guidance to young scientists in the fields of basic, applied, translational and clinical research.

QBRI offers internship opportunities for exceptional under-graduate and graduate students in specific disease areas of diabetes, cancer and neurological disorders research. As an intern, it is a great opportunity to meet new people, explore exciting areas of scientific research, and learn first-hand about biomedical research protocols and techniques. Every year QBRI conducts Summer Research Program (SRP) which is an intensive research training for undergraduate students. To learn more about SRP please [click here](#).

QBRI is a proud partner of Qatar Research Leadership Program (QRLP), a capacity building program offering unique opportunities for young scientists in Qatar to pursue careers in health and biomedical research.
