Overview

Athlete Cardiac Monitoring System is a wearable solution designed to enhance athlete safety by providing real-time heart monitoring during training and competition. Equipped with ECG sensors and AI-driven analysis, it detects cardiac abnormalities, minimizes false alarms, and delivers timely alerts to medical teams. The system is lightweight and comfortable. It ensures athletes can perform at their best while enabling healthcare professionals to intervene quickly, preventing potential cardiac risks and improving overall athlete health management.

Product Description

Centralized monitoring of multiple athletes during games, training, and rehab

Live heart rate and single-lead ECG with 130-500 Hz transmission

Near real-time monitoring and alerts for heart rate abnormalities

Personalized baseline setting and checks for athletes

Play-back option for recorded ECGs

Target Audience

Soccer clubs

Basketball clubs

Cricket clubs

Sport competition organizations
