

Getting Started

Throughout the Cayuse submission, you will be required to provide the following:

- Detailed Study Information
- Informed Consent Form
- Study recruitment documents if any
- Institutional approval
- Supervisor approval for students
- IRB approval and a copy of the approved consent form used to collect primary clinical data and biospecimens in case of secondary use of samples
- Valid CITI certificates for all research team members
- A valid Institutional Biosafety Committee (IBC) approval for the proposed proposal if it involves the use of biospecimens
- Up-to-date resume of the principal investigators
- If the research activity will be conducted on a site outside the HBKU premises, a copy of the authorization to access that site needs to be provided. For instance, the researcher needs the permission from the ministry of education to enter a school to conduct a survey or interviews
