Overview

Fanar is a groundbreaking Generative AI (GenAI) framework developed to achieve an in-depth understanding of Arabic, encompassing diverse dialects and cultural expressions. Fanar is sponsored by the Ministry of Communications and Information Technology and partnered with several organizations, including Qatar National Library, the Ministry of Endowments and Islamic Affairs, Al Jazeera, the Arab Center for Research and Policy Studies, and Qatar University. Fanar bridges the Arabic language and culture with the latest advancements in AI, aligning with Qatar National Vision 2030 and the objectives of the Digital Agenda 2030.

Product Description

Culturally and religiously awareness: Incorporates an understanding of the nuances of Arab cultures and Islamic values.

Fluent in Arabic dialects: Understands a wide range of Arabic dialects.

Intuitive and interactive: Integrates voice-based interaction that enables natural conversations.

Enables fact-checking: Finds sources for information and provides citations for accuracy and fact-checking.

Polite and ethical: Always respectful, tolerant, and grounded in strong ethical principles.

Target Audience

Fanar is publicly available to users worldwide.
