

2nd International Conference on Sustainable Energy-Water-Environment Nexus in Desert Climate

November 22 – 25, 2021
Minaretein, Education City
Doha, Qatar

Qatar Environment and Energy Research Institute (QEERI) is organizing a specialized conference in November 2021 to address the challenges and opportunities in the Energy-Water-Environment (EWE) nexus for the desert climate. Building upon the phenomenal success of our first flagship ICSEWEN19 conference, over 500 researchers, scientists, engineers, policy makers, and stakeholders are expected to attend the four-day event.

The main goal of this conference is to bring together international experts from academia and industry - as well as relevant stakeholders - to share the latest research, technology, and innovation developments.

We are currently inviting sponsors to join us, allowing each to benefit from a wide range of exclusive benefits and use of the QEERI EWE nexus platform to elevate their brands. We have made available the following sponsorship packages with options for customization:

1. **Platinum**
2. **Gold**
3. **Silver**
4. **Bronze**

We hope you will join us in building this conference to be the flagship event in the field of energy, water and environment research and technology development, especially for Qatar and the MENA region.
